Dear Ms. Evans & Dr. Carter,

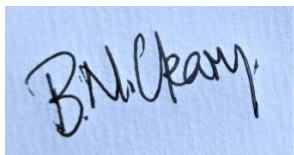

RE: COMMENT: ALBANY WIND FARM PROJECT EIA PROCESS

With reference to your Public Participation Process for the EIA Phase of your Albany WEF Project; herewith the following comments as our inputs:

- i) Noting the development of our proposed Governor's Fort WEF bordering your Albany WEF's footprint to the north and south; we request that you consider and confirm the required buffer/s of your Albany turbines from cadastral boundaries of the Governor's Fort's land parcels listed here: 0/217; 1/206; 8/226; 0/233; 4/226; 0/220; 1/220; 0/615; 1/223; 1/359; 2/359; 3/359; 0/224; 1/224; 5/226.
- ii) We would like to place on record that due to the closeness of your Albany WEF to our proposed Governor's Fort WEF; Wake Effect Impact will be an issue the owners of the two Projects will have to deliberate on at a future date.

Thank you,

Sincerely,

Bruce Cleary.
Project Manager: Eastern Cape Province
