Dear Caroline

In preparing submission to DEFF regarding Albany Wind Energy Facility, DEFF Ref: 14/12/16/3/3/2/1131 we have realised an omission in the provisional comments by the Indalo Association submitted to the CES on or about 13 July 2020 in respect of the Draft EIA for the proposed Albany Wind Energy Facility (WEF) which we have updated with the attached. These Revised Comments consist of the Executive Summary below and the Comments and should be read with the different specialist studies and annexures in separate files. The Revised Comments are substantially the same with some editorial changes. The only material aspect that has been added is our concerns regarding the cumulative impacts posed by the different WEFs that were not clearly expressed before.

Please advise when responses will be provided / Comments and Responses Report issued and if you have advised the applicant to submit Final EIR or if you have concluded that scope of work must be expanded or identified exceptional circumstances such that the applicant will request extension in terms of 23(1)(b) or of 3(7) of EIA Regs.

Thank you in advance, regards

Theo Fischer
