**Riparian/valley and Scarp Forest on south-facing slopes.**

**Riparian/valley and Scarp Forest on south-facing slopes.**

**Upstream view of a typical watercourse with natural vegetation (trees) along the central portion of the alignment.**

**Mainstem watercourse typical of the area, with a defined although narrow riparian zone, but also showing the level impact and invasive vegetation that occurs at many of the proposed areas that the grid will need to span.**

**Lower reaches of the Qinira River after heavy rains, that will be spanned by the proposed OHL cable route to Neptune.**

**A higher number of small farm dams are located along the alignment, with one small seepage zone feeding the lower valley**
